ETM

Redefining Education To Make You Relevant.

Educational Transformation Movement

A complete educational operating system — Robotron-certified, ETM-powered, built on South Korean Educational Standards — for the schools that intend to lead the next decade.

“A Project of Robotmea, Powered by ETM on South Korean Educational Standards. Accredited by Robotron, South Korea.”

THE IDEA

A new category of school. Built to a single standard.

- A movement provides a world-class educational experience to every child on South Korean Standards.
- ETM is a movement which integrates emerging technologies, curriculum and islamic values.

First

South Korean Accredited School in Pakistan

Robotron

Accrediting body · South Korea · 25+ years

NCP

Integrated with the Pakistan National Curriculum

THE FRANCHISE STRUCTURE

Who is who.

ETM is a regulated franchise system. The relationship between the four parties — and what each is accountable for — is fixed in writing before a single brick is laid.

● ETM FRANCHISOR	Robotmea
● ETM FRANCHISEE	Investor's School
● ACCREDITING BODY	Robotron, South Korea
● PEDAGOGICAL ANCHOR	S. Korean Standards + NCP

WHAT YOU GET

The standards stack.

Five published standards. Non-negotiable across every ETM school. The structural reason ETM is a movement

01 Friends of Quran & Role Model (SAWW) Programme

02 STEAM-Integrated Academic Planning

03 Discovery & Innovation Hub

04 ETM Garage

05 Faculty Development Cell

INSIDE AN ETM SCHOOL

Six features. One coherent experience.

01

Project-Based Inquiry Learning

02

TechNutrition 365

03

The One-Book Model

04

Compulsory Arabic

05

Reimagined Roles

06

Regular ETM Audits

WHAT ETM REFUSES TO DO

No Homework

Learning happens at school.

No Heavy Bags

The one-book model.

No Boring Classes

PBIL is the default.

No Rote Learning

Portfolios over memorisation.

No Exam Pressure

Continuous assessment.

WHAT MAKES ETM DIFFERENT

The five-point story

- 01 ETM-Powered Model
- 02 Student-Centric Environment
- 03 Islamic Values at the Core
- 04 Emerging Technologies
- 05 Reimagined Roles

THE INVESTOR REASSURANCE

What stays yours. What comes from us.

The single most important question an investor asks. Here is the answer, in one table.

YOURS

What you keep.

- ✓ Your school's name and identity
- ✓ Your buildings, your capital, your land
- ✓ Your local hiring (within our framework)
- ✓ Your fees and your community
- ✓ Your management team
- ✓ Your day-to-day operations

OURS (ETM)

What we bring.

- ✓ The Robotron, South Korea certification
- ✓ The Academic Planning Standard
- ✓ The Discovery & Innovation Hub blueprint
- ✓ The ETM Garage standard
- ✓ Teacher training pathway + Faculty Development Cell
- ✓ M&E framework + quarterly ETM audits

SPEAKING TO EVERYONE

Four audiences. One promise.

A different answer for each audience — the same accreditation behind every claim.

FOR PARENTS

A future-ready child.

Safety, Islamic values, no homework or exam pressure — and fluency in the technologies the next decade will demand.

FOR INVESTORS

A scalable franchise.

ETM accreditation by Robotron, South Korean standards, and a category-defining proposition with an audited expansion path.

FOR EDUCATORS

A career-grade institution.

The Faculty Development Cell, teacher-as-coach model, the ETM Garage, and global benchmarking.

FOR MEDIA

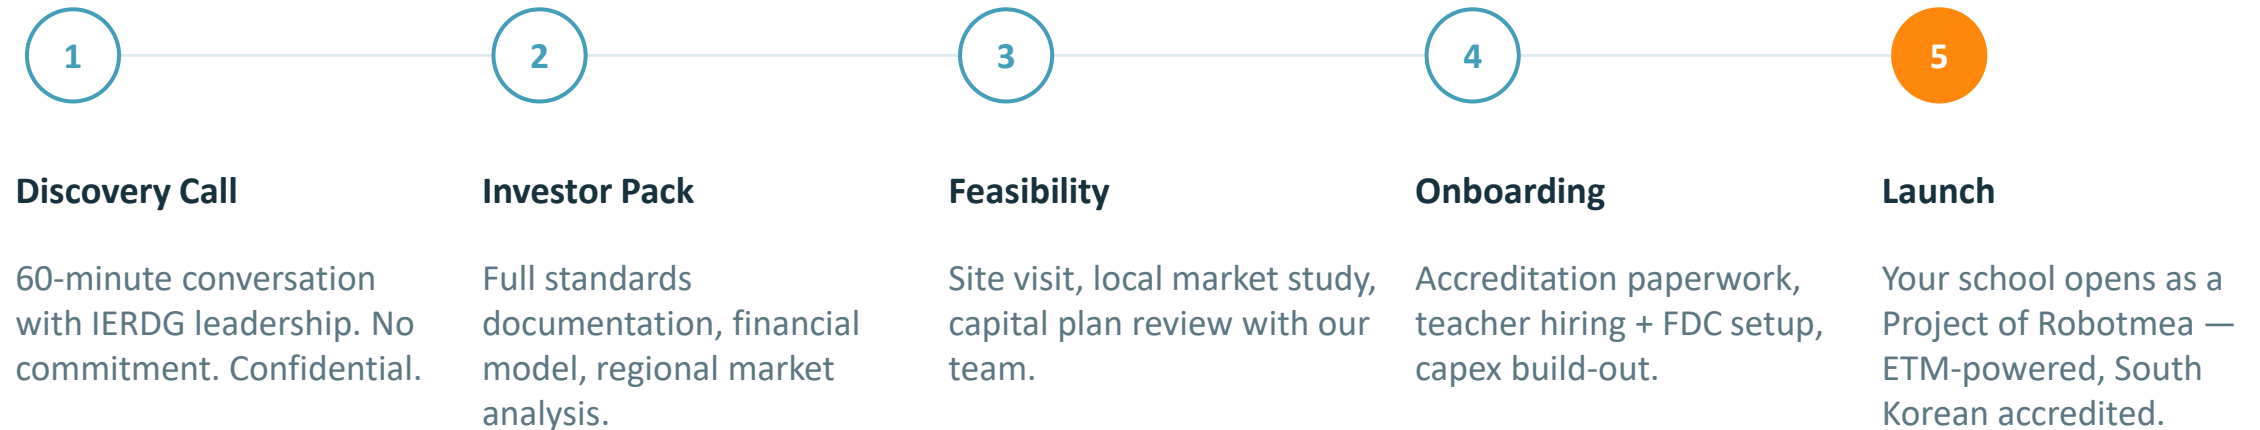

A movement, not a school.

Pakistan's first ETM-powered school. From transactional to transformational.

THE INVESTOR JOURNEY

From conversation to open doors.

A typical ETM partnership moves from first call to a fully licensed, operational school in five structured stages.

INVESTOR FAQ

The questions investors ask first.

Q01 Convert or build new?

Both. Greenfield (built ground-up to ETM standard) or Transformation (existing school converted over a defined runway).

Q03 Who owns the certification?

Robotron accredits; Robotmea holds the master accreditation. Your school carries it under licence while in good standing.

Q05 Timeline to opening?

Greenfield: typically 9–14 months from signing. Transformations can open to ETM standard from the next academic year.

Q02 Fee structure?

Licensing model: one-time onboarding fee, annual licence fee per campus, and a per-student royalty. Full schedule in the Investor Pack.

Q04 How is quality enforced?

Quarterly on-site audits, a central data system, and an annual public Impact Report — with a remediation cycle before any licence action.

Q06 Multiple campuses?

Yes — a master agreement covers multiple campuses with reduced onboarding fees and a unified audit, training and curriculum stack.

GET IN TOUCH

Join the ETM Movement. Make your school relevant.

Pakistan's first ETM-powered schools are already operating. The next one is yours to build.
